Subject: Re: glider kit certification

Thank you for answering, this information helps make things more clear and understandable. I will get to work on our notification letter and send it over to you for acceptance.
 Thank you again for your help.
 Dave Francis

 Subject: RE: glider kit certification

Dave,

For the purposes of the EPA regulation your company is considered to be a manufacturer because you complete the assembly of the truck. So NAICS Code 336120 is applicable and has a size threshold of 1500 employees.

Here is the information I send to companies interested in the small business glider builder requirements:

EPA regulations allow small businesses to build gliders using older (pre-2010) engines under certain conditions and restrictions. First, the company must qualify as a small business according to the applicable regulations and they must have built gliders in the time period of 2010 through 2014 and sold at least one to another company or person in 2014. You would be limited in the number of gliders you can build per year to the maximum number you built in any single year 2010 through 2014. The regulations (40 CFR 1037.150(c)) require a small business to notify EPA that they intend to utilize the small business provisions. We ask small businesses to send us a letter of notification annually that includes a number of bits of information justifying that they qualify for the small business allowances. A short letter that contains the following information is all that is needed:

- A statement that your company meets the small business criteria listed in 40 CFR 1037.150 (c) and the small business criteria specified in 13 CFR 121.201. (Assuming this is true.) Currently the size threshold for Heavy Duty Truck Manufacturers is 1500 employees – this is what is listed for NAICS Code 336120. The total number of employees includes that of the company and its affiliates (see 13 CFR 121 link below).
- A statement that your company is solely owned by (owner's name) and if there are multiple owners state each owner and the percentage ownership for each. Also describe any affiliations with other companies or state that there are no affiliations – assuming that is true.
- State the number of employees for each of the past 3 years.
- State the number of gliders that your company has built each year 2010 through 2014.
- Signed by the owner(s) or company official.

You should scan the signed letter and send the PDF file to me. I will then review it, stamp it and return it to you. You can use the wording I used above (just substitute in the actual company name) if that helps. You can then show the EPA reviewed letter to the truck manufacturer as proof you have notified the EPA.

For your reference here are a number links to regulations that are applicable:

40 CFR 1037.150 Interim Provisions – this covers the small business exclusion requirements (1037.150(c)) and the new interim glider requirements (1037.150(t)):

Subject: glider kit certification

Mr. Healy,

My name is Dave Francis and I own a heavy duty truck body/paint shop in ST.Louis, MO, we also assemble glider kits for customers. I was told we need to register with the EPA in order for us to continue such assemblies. My questions are - In reading the regulation 13 CFR121.201 the NAICS Code 336120 for a small business - this refers to a manufacturer, we do not manufacture; we order the kit for our customer, the customer supplies the parts and we assemble everything and have it inspected by the state, customer then titles the kit for their business. Therefore which NAICS Code would be correct for us? In order for us to continue assembling glider kits exactly what do we need to do and what information do you need?

Thank you,
Dave Francis
